UNLOCK PRO-LEVEL WORKFLOWS IN VMIX WITH DEKTEC SDI CARDS

DekTec is pleased to announce that the DTA-2172 and DTA-2174B have been officially validated and approved for use with vMix . This integration empowers broadcasters and content creators to elevate their video production by seamlessly incorporating DekTec's cost-effective, high-performance video capture and playout solutions into their vMix setups.
The DTA-2172 provides two SDI inputs supporting up to 3G-SDI, while the DTA-2174B offers four SDI inputs up to 3G-SDI or a single 4K 12G-SDI input for higher-resolution workflows. Both cards are part of DekTec's flagship SDI lineup,known for their reliability and flexibility in handling diverse video formats and standards. With these cards, vMix users can now capture and process professional SDI streams directly within their vMix environment.
