DTU 315

All-Standard, All-Band Modulator for USB - 3

- Modulator for all popular DTV standards
- Fully agile over VHF, UHF and L-band
- USB cable supplies power, data, control

DTU 238

DVB-T2/T/C, ISDB-T and ASI Analysis Probe for USB-2

- Portable RF analysis and monitoring
- Additional ASI transport-stream input
- No power supply or batteries required

DTU 215

USB-2 VHF/UHF Modulator

- No power adapter required
- Fully agile from 36 to 1002MHz
- Channel simulation option

DTU 245

FantASI USB-2 ASI/SDI Input+Output Adapter

- Portable streaming of DVB-ASI and SDI
- The essential tool for every DTV engineer
- No AC power adapter required

DTE 3114

Quad QAM Modulator with IP Input

- Four QAM-A/B/C modulators
- Agile from 32MHz to 1GHz
- RTP with FEC decoding on each channel

DTA 2174

4x 3G-SDI/ASI Input/Output, Genlock Input, 4K Support

- Real-time processing of 3G-SDI/4K signals
- Supports 3G-SDI level A and level B
- Optimized for DekTec Matrix API

STREAMXPERT 2.0

Transport-Stream Analyser Software

- Full decoding of DVB/SI and ATSC/PSIP
- Real-time TR 101 290 monitoring
- SD/HD live decoding; PCR analysis

DTC 720 XPECT Mosaic

24/7 DVB and ATSC Monitoring Solution

- Fully-featured DTV monitoring solution
- User-defined template matching
- Includes advanced Mosaic multi viewer

The world's most sophisticated CAM-CCU solution

---

http://www.adder.com/

Adder design and manufacture an advanced range of KVM switches, extenders and IP solutions which enable the reliable control of local, remote and global IT systems. Adder's KVM (Keyboard, Video monitor, Mouse) switches allows users to access and control multiple computers from one (or more) keyboard monitor and mouse. This results in reduced complexity and improved efficiency of IT systems.

CAPTURE CARDS

Osprey® 460e

Specifications:
Video Input:
• 4 composite (BNC x 4)
Audio Input:
• 4 Unbalanced stereo (RCA x 8)

Osprey® 820e

Specifications:
Video Input:
• 2x DVI-I, 2x HDMI
Up to 1920 x 1080 at 60 fps (DVI - HDMI adapters included)
• 2x VGA/XVGA resolutions
Up to 1600 x 1200 at 60 Hz (DVI - VGA adapters included)
• 2x Component, 6x Composite, 2x S-Video
(Component breakout, BNC - RCA adapters Included, and BNC - mini included)
Audio Input:
• HDMI (2 x 8 channels LPCM)
• Unbalanced (1 x stereo)
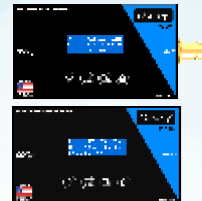

CONVERTERS
HDMI to 3G SDI, 3G SDI to HDMI

PHOENIX AUDIO TECHNOLOGIES

Spider
The Ideal Audio
Conference Solution

Spider MT505 Features:

▪ Four microphone beamforming array
▪ Full duplex communication
▪ Automatic gain control
▪ Bridging between USB and VoIP/SIP/IP
▪ Echo Canceling
▪ LED lit control buttons
▪ Noise Reduction
▪ Supports PoE (Power over Ethernet)
▪ De-reverb
▪ Dual audio/video Platforms
▪ DSP Based Algorithms
▪ Daisy Chainable
▪ Directional LED lighting

DUET

SOLO

CONDOR MICROPHONE ARRAY – MT600

The Condor Beamforming Microphone Array was created with the goal of decluttering conference rooms. The Condor, featuring a built-in SIP phone, sits above or below your monitor, eliminating cumbersome devices and wires from the conference table. It can easily connect to any video conferencing system, and use any external sound bar or your monitor's internal speakers.

streamstar

State Of The Art Live Production And Streaming Solutions

Streamstar® is an award-winning, extreme performance, professional, multi-camera, live production and streaming portable studio.

Its highlights are the multicamera live camera inputs, the superb Replays and Slow Motion system on all 6 channels, ISO recording of all 6 cameras, built in character generator and integrated JVC camcorders remote control.

Along with superb graphics capabilities and the legendary Streamstar® intuitive touch screen user interface it offers incredible flexibility, greatest creative freedom and ultimate performance.

Streamstar received the SATIS EXPO 2016 "Coup De Coeur" Prize for innovation in the live production and streaming products category.

Streamstar® the new standard for live sports streaming.

Rabbit Labs is one of market leaders in Common Interface, DVB-CI+, and Digital Video Broadcasting testing tools. Founded in 2009, the company serves TV and CAM manufacturers, as well as operators, globally.

THUMPER SUITE
TV Test Lab in a Box

The Thumper Suite provides a full environment for testing TV over a pay TV network. The Thumper Box also contains test plans and interactive user interface for executing tests. Forget about recording gigabytes of live data, keeping a zoo of subscrip- tion cards, and trying to configure a bunch of RF network equipment.

CAM INSPECTOR

The CAM Inspector is the definitive tool for any company working with CI/CI+. It provides an in-depth view of everything that is happening on the Common Interface, from low-level hardware timings to high-level application behaviour, including incoming and outgoing transport streams.

CAM TESTER
All-in-one DVB-CI/CI+ CAM Maintenance Tool

Standalone DVB-CI and CI+ CAM Tester
The CAM Tester is a self contained pocket sized DVB-CI Host. It is capable of quickly initialize and communicate with any DVB-CI or CI+ compliant CAM and report its status on the integrated OLED screen.

Media4Display

Digital Signage Solution

TELELOGOS

Create

Drop and manage your media in a public Media Store (shared by all users) or a private Media Store (local content management). Media4 Display supports all types of media content: images, videos, PPT, PDF, HTML, Flash, IPTV…
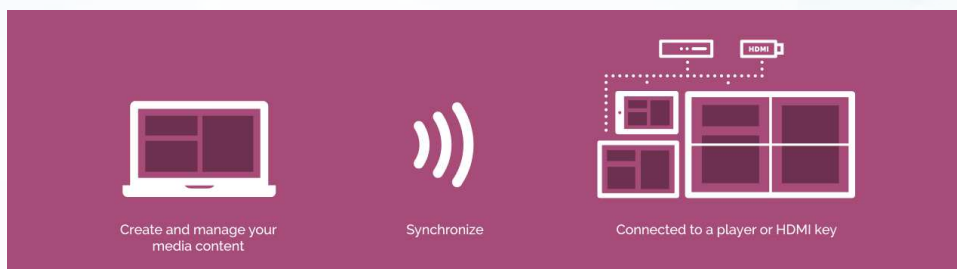

Manage

A sequence is a set of slides/media that will be displayed on your screens network. Media or slide broadcasting. Each sequence can be planned « in a loop » or for an immediate broadcast on all screens or a specific group of screens.

Display

Once sequences are established and scheduled, users can start the transfer of its content and its scheduling on targeted screens. Then, each screen displays the contents in a continuous loop according to the (specified) scheduling.

Create and manage your media content   Synchronize   Connected to a player or HDMI key

CENTRAL DELIVERY ⏐ MASTER ARCHIVE ⏐ DATA VAULT

Integrated Media Hub (IMH) is a determinant solution for you to make more and better business. Whatever your role is in the Industry (Producer, Post-production Studio or Distribution Platform), IMH is the tool to manage content and connect and collaborate with your partners, clients or suppliers, globally.

Moreover, IMH provides a large set of processing and editing features that run in the Cloud, in an automated way, on any amount of Content files. Take advantage of the power, speed and cost efficiency of IMH Cloud processing, and amaze your Clients.

- **NEULION MC ENCODER 2.7**
  Ready-to-use HEVC / AVC live encoding solution for multiscreen delivery of adaptive streaming formats using SDI and IP ingest sources required for OTT workflows.

- **TRANSCODING SDK**
  Highly flexible file-based encoding & decoding engine ,

- **HEVC/H.265 SDK**
  SDKs for best-in-class video compression and the world's fastest decoderfor HEVC/H.265 supporting up to 8K 8-bit/10-bit profiles and most popular HDR flavors.

- **CODEC SDK**
  MainConcept SDKs enable solutions serving broadcasters, camera manufacturers, Post-production facilities as well as medical and surveillance equipment manufacturers.

Bbright brings visionary solutions and products to the professional video industry. BBright is focusing on rapid market transitions around 4K/UHD, HEVC, multiscreen and content delinearization. BBright develops high-end 4K and HEVC technologies including broadcast appliances such as playout servers and transcoders for the video ecosystem.

4K Encoder Solutions

- **UHD-24/7 :** baseband video playout server for broadcast / IPTV head-ends

- **UHD-24/7 :** baseband video playout server for broadcast / IPTV head-ends

- **UHD-TS :** 4K – UHD Transport Stream file playout for linear channel

- **UHD-Play :** quad 3G-SDI Ultra-HD uncompressed file player for tests

- **SLED-4K :** Ultra-HD HEVC encoder for live channel

https://www.quine.no/

Quine is all about integrating and automating your workflows. Our ambition is to support the "tools you use", but platforms are added by paying customer requests.

The QuineBox IoT makes any supported camera a connected device, and you can push files and metadata to any API or ftp/sftp destination.
